Key:

Green(*): Use this if you are not currently exercising
 Blue (#): Use this if you are currently doing 1-3 hours of exercise weekly
 Red (^): Use this if you are currently doing 3+ hours of exercise weekly
 Blank day: This is a day off from cycling

Notes:

Day 1 may be any day of the week
 Follow the order as numbered and follow the calendar
 The most important workout days are 6 or 7
 Your tour begins week 13; start 12 weeks prior to the tour
 Each letter/number code refers to a style ride specified on pg. 2

DAY 1	How to Ride
E1	Ride very easily on a mostly flat course or indoor bike trainer. Use a low gear and keep cadence comfortably high.
E2	Ride a road course with small rolling hills or ride an indoor bike trainer shifting between high and low gears frequently.
S	Work on pedaling and bicycle handling skills.
F	Ride a hilly course staying seated on most climbs at a moderately hard effort. Cadence should be no lower than 60 rpm (count right foot for 15 seconds and multiply by 4 for cadence). If you cannot maintain at least 60 rpm on the steepest hills, talk with the bike shop about either adding a third chain ring or lower gear sprockets. If this workout hurts your knees substitute for E2.
M1	Following a good warm-up ride, ride non stop for 10-15 minutes at a moderate effort on a mostly flat course or indoor bike trainer.
M2	After warming up well, ride 5 minutes at a moderately hard to effort on a mostly flat course or indoor bike trainer. Then rest by spinning in a low gear for 2 minutes. Repeat this 2-3 times.
M+F	Warm up well. Then on a hill that takes 5-6 minutes to ascend, while staying seated, climb 3-5 times at a moderately hard effort. Recover after each climb by coasting and spinning down the hill for 3-4 minutes before starting up again. Cadence should be no less than 60 rpm on each climb.
